

Only YOU can

**DON'T
pour grease
down
the drain!**

**CAN
the
GREASE**

Grease builds up and will eventually block the pipe. When this happens, the drain backs up into the sink. If the clog is in a sewer pipe, raw sewage can back up into your house!

1. Pour or scrape grease from pots and pans into a can.
2. Store the can in your refrigerator.
3. When the can is full and the grease is chilled solid, throw it in the garbage.
4. Pour used liquid frying oil into containers that can be capped and thrown in the garbage.

**Hot water does NOT
dissolve grease....**

it just pushes grease down the drain, where it quickly cools and sticks to the inside of the pipe.
